

INTEGRATED PEST MANAGEMENT ANNUAL NOTICE

Central School District #301 practices Integrated Pest Management, a program that combines preventive techniques, non-chemical pest control methods, and the appropriate use of pesticides with a preference for products that are the least harmful to human health and the environment. Applications of pesticides are made only when deemed necessary to control a pest problem and after trying other means to control the problem. The term “pesticide” includes insecticides, herbicides, rodenticides, fungicides, miticides and desiccants.

We have a registry of parents who will be notified in the event of pesticide applications. Anyone who would like to be notified should email their request to the following email address: pesticides@central301.net. Information required in the email should include your name, school and an email address in which to respond. Your information will then be added to our contact group.

Please be advised, if there is an immediate threat to health or property that requires treatment before notification can be sent out, parents will receive notification as soon as possible.

Sincerely,

Dan Polowy
